### Providing Flexible Workspaces across Central London!

## Industry News

With over 228 operators now managing four or more locations, the market has entered a critical consolidation phases.

This surge in operator numbers reflects the massive growth of flexible workspaces, driven by a 111% increase in managed office supply year-on-year and 10.6% quarter-on-quarter.

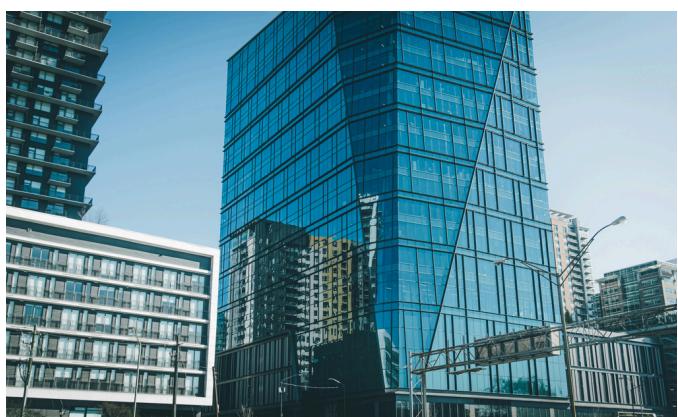

Despite this expansion, not all players will survive the upcoming shake-up.

Industry experts predict that only 10–15 operators will emerge as market leaders with truly scalable and sustainable business models. (**Source, Right**).
